

Launch of PatientsMap China 2018

“Hypertension” is the most commonly seen disease by the physicians in China, followed by “diabetes” and “dyslipidemia”.

On June 4th, 2018, SSRI and M3 will launch PatientsMap China 2018.

PatientsMap Japan, which is updated on an annual basis, is a database from over 20,000 physicians uncovering the type of diseases that they see and its number of patients for approximately 400 different diseases. US version and UK version of PatientsMap are also available, and this Chinese version makes it the 4th country for the PatientMap series.

PatientsMap China 2018 contains data for over 10,000 physicians collected via M3’s Chinese physician portal site medlive.cn

“Hypertension” is the most commonly seen disease by the Chinese physicians

According to PatientsMap 2018 China, “hypertension” is the most commonly seen disease by the Chinese physicians with 70.7% of the physicians answering that they see such patients. “Hypertension” was followed by other life-style diseases such as “diabetes (67.6%)” and “dyslipidemia (54.7%)”.

In comparison to Japan, life-style diseases such as “hypertension” “diabetes” “dyslipidemia” and “gout/hyperuricemia” are commonly seen by physicians in both countries. However in Japan, while allergy related conditions such as “allergic rhinitis” and “bronchial asthma” are commonly seen, in China, non-allergy related respiratory conditions such as “acute upper respiratory tract infection” and “pneumonia” are more commonly seen.

When comparing China and US, lifestyle diseases such as “hypertension” and “diabetes”, along with “acute upper respiratory tract infection” are commonly seen by physicians in both countries.

Table 1. PatientsMap 2018 China – top 10 diseases seen (n=10,285)

Rank		% seen
1	Hypertension	70.7%
2	Diabetes	67.6%
3	Dyslipidemia (Hyperlipidemia)	54.7%
4	Acute upper respiratory tract infection	51.6%
5	Pneumonia	50.7%
6	Cerebral infarction	44.9%
7	COPD	44.3%
8	Constipation	39.9%
9	Peptic ulcer	37.8%
10	Gout/hyperuricemia	37.2%

Table 2. PatientsMap 2017 Japan – top 10 diseases seen (n=20,135)

Rank		% seen	Rank in China
1	Hypertension	63.8%	1
2	Diabetes	58.2%	2
3	Constipation	55.9%	8
4	Dyslipidemia (Hyperlipidemia)	51.0%	3
5	GERD / NERD	50.3%	-
6	Seasonal allergic rhinitis / hay fever	46.8%	-
7	Bronchial asthma	43.9%	-
8	Gout/hyperuricemia	41.9%	10
9	Pneumonia	41.1%	5
10	Gastritis and duodenitis	39.2%	-

Table 3. PatientsMap 2016 US – top 10 diseases seen (n=5,034)

順位		診療率	中国での順位
1	GERD / NERD	50.1%	-
2	Hypertension	46.0%	1
3	Iron deficiency anemia	44.2%	-
4	Diabetes	43.9%	2
5	Constipation	43.6%	8
6	Depression	43.4%	-
7	Obesity	43.0%	-
8	Urinary tract infection	41.9%	-
9	Lower back pain	40.3%	-
10	Acute upper respiratory tract infection	39.7%	4

Outline of PatientsMap 2018 China

The data for this product is collected by random sampling per department via “medlive.cn” panel, which is a portal site for healthcare professionals in China operated by M3 Inc.

Disease coverage:	357 diseases/conditions
Sample:	Medlive.cn panel
Sample size:	n=10,285 (various departments)
Methodology:	Online survey
Study period:	January 3 rd – March 6 th , 2018
Study topics:	<ul style="list-style-type: none"> - Diseases/conditions seen - Number of patients seen per month (per disease/condition) - Number of patients in which they prescribe medications for that disease/condition - Diseases in which they wish for new product development - Sales rep visitations in the past month (69 manufacturers)
